WORK EXPERIENCE

Full stack developer
Fosofts Solutions

12/2024 - Present   *Trivandrum*

As a Full Stack Developer at Fosofts Solution, I contribute to the full-stack development and maintenance of the company's web application and website, from front-end design to back-end functionality.

Achievements/Tasks

- Developed front-end interfaces using **Next.js** and **React.js** , focusing on responsive and dynamic user experiences.
- Used **Figma** for UI/UX design collaboration, translating designs into interactive, user-centric web applications.
- Built and maintained back-end services using **Node.js** , ensuring smooth data flow and API integrations.

Contact : *https://www.fosofts.com/*

Mern stack developer
NullClass

01/2023 - 03/2023   *Bengaluru*

*During my internship at Nullclass, I developed a chatbot, integrating the front-end and back-end while creating user-friendly interfaces in **Figma** . This experience enhanced my full-stack development and UI design skills.*

Achievements/Tasks

- Integrated **OpenAI GPT model API** to enhance the chatbot's conversational capabilities.
- Implemented **Google Sign-In** service for secure user authentication.
- Built the back-end with **MongoDB** for efficient data storage and management.

Web developer
Freelancer (Upwork)

03/2023 - 12/2024

As a freelancer, I successfully manage projects, consistently delivering high-quality results ahead of deadlines while ensuring all user requirements are met

Achievements/Tasks

- Agile Methodology
- Integrated a payment gateway (Razorpay)
- E-Commerce Web/Mobile application

EDUCATION

Study Program
East West College of Management - Banglore

09/2022 - Present   *Bedarahalli,Banglore*

Courses

- BCA in Cloud Computing & Ethical hacking

SKILLS

Agile/Scrum   Javascript   React native   Reactjs   UI/UX Design   Figma   Git   RESTful API   Problem Solving   Nextjs   MongoDB   Python   Communication   Keyboardist   Singer

PERSONAL PROJECTS

ChordBeats (Digital Studio) (09/2024 - Present)

- I created **Chordbeat** , a game-changing digital studio web application developed in **React.js** . This innovative platform allows users to create music beats and play virtual musical instruments, such as the piano. Additionally, it includes features for audio editing and trimming, empowering users to refine their sound with ease.

Personal Voice Assistant (04/2024 - 09/2024)

- I developed a personal voice assistant capable of performing various tasks on a computer, including shutting down, opening applications, and setting alarms. This project utilizes **Python** for backend functionality, the **Eel** library to integrate a user-friendly interface, and **MongoDB** to store data efficiently.

ACHIEVEMENTS

Intership completed certificate (01/2023 - 03/2023)

Attended Cyber Security webiner (02/2023)
